

ChiliProject - Bug # 1117: New forum link displayed when not permitted to create

Status:	Open	Priority:	Normal
Author:	Tom Rochette	Category:	User interface
Created:	2012-08-13	Assignee:	
Updated:	2012-08-13	Due date:	
Remote issue URL:			
Affected version:	3.3.0		
Description:	Under the <i>*Forums*</i> menu item, you can see the link <i>*New forum*</i> even though you may not have the permission to do so.		
	Expected: the link is not visible if you cannot create a new forum.		
	This is to be consistent with the behavior of the wiki, where if you cannot edit a page, the link is not displayed.
