

ChiliProject - Feature # 236: Wiki Settings should work without JS

Status:	Open	Priority:	Normal
Author:	Gregor Schmidt	Category:	Wikis
Created:	2011-02-28	Assignee:	
Updated:	2011-02-28	Due date:	
Remote issue URL:			
Affected version:			
Description:	While most, if not all, project settings work with AJAX and without JS, the wiki settings do not. This should be fixed.

Started working on it at "schmidt/chiliproject/f/236-...":<https://github.com/schmidt/chiliproject/tree/f%2F236-wiki-settings-should-work-wo-js>. It currently misses the handling of validation errors in the no-JS-part.
