ChiliProject - Bug # 333: [REST] no error message on PUT and DELETE

Status:	Declined	**Priority:**	Normal
Author:	Emmanuel Bourgerie	**Category:**	REST API
Created:	2011-04-14	**Assignee:**	
Updated:	2011-04-14	**Due date:**	

Remote issue URL:	
Affected version:	1.1.0
Description:	By using REST API, there is not return message about PUT and DELETE actions (we tested only for xml). We would wish at least, have a return message to know if this action is ok or no.

History

2011-04-14 09:00 am - Holger Just

- Status changed from Open to Declined

The result of the action is indicated in the HTTP status code of the response, as it is common in REST interfaces.

If you get a @200@ back (or a @201 Created@ in the case of @POST@, with a link to the new resource in the @Location@ header), everything went find. If you get a @4xx@ or @5xx@ back, there was some error.

If you experienced diverging behavior, please create a new issue with a specific error description.
