

ChiliProject - Bug # 612: Back urls containing umlauts redirect to "my page"

| | | | |
|---|---|------------------|--------|
| Status: | Open | Priority: | Normal |
| Author: | Romano Licker | Category: | |
| Created: | 2011-09-07 | Assignee: | |
| Updated: | 2011-12-02 | Due date: | |
| Remote issue URL: | | | |
| Affected version: | | | |
| Description: | The CGI.unescape unescapes the characters of the path as well. An URL like: chili.org/Ã¶Ã¼u.html would fail during redirect. | | |
| See fix https://github.com/chiliproject/chiliproject/pull/101 | | | |

Eric, I haven't really managed to come up with a good test for the @ApplicationController#redirect_to_back_or_default@, do you have an idea?

2011-12-02 12:07 am - Eric Davis

I think this is another test where we need to use a browser engine like capybara instead of just get/post/put to urls. That way we drive the form submissions directly and the form uses its back_url parameter (we have a deferred test that needs this too).
