ChiliProject - Feature # 624: Add the text_formatting setting to the project settings

Status:	Open	**Priority:**	Normal
Author:	Riceball LEE	**Category:**	Text formatting
Created:	2011-09-15	**Assignee:**	
Updated:	2011-10-13	**Due date:**	

Remote issue URL:	
Affected version:	
Description:	I am writing a plugin to support multiple wiki formattings and let the project can select the text formatting in the project settings overview now. But I have to patch some code into chili, I hate patch. I wish the project text_formatting setting can be migrate into chili directly. the attachment is the patch. Do not forget to migarate the db too.

```ruby

class UpdateProjectTextFormatting < ActiveRecord::Migration
  def self.up
    add_column :projects, :text_formatting, :string, :default => "", :null => false
  end

  def self.down
    remove_column :projects, :text_formatting
  end
end
```
