<b>Affected version:</b>			
<b>Description:</b>			
The breadcrumb, as well as top and side navigation often suffer from too long texts breaking the design. Using overflow: hidden hides the context. The user does not know that there is more text hidden somewhere.  Css class: 'text-overflow: ellipsis' solves this problem by adding '...' at the end of the line.  On top of that most browsers and most surprisingly the IE 6+ support this feature. However Firefox supports this from version 7.
