

## ChiliProject - Feature # 754: Allow adding / changing issue parent after creation

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Nick Andriopoulos	<b>Category:</b>	Issue tracking
<b>Created:</b>	2011-12-05	<b>Assignee:</b>	
<b>Updated:</b>	2011-12-05	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	Hello,  at the moment, as far as I could tell, there is no way to alter or add a parent to an issue after its creation. Since issue reporters are infamous about neglecting to use the search function, or simply being oblivious to the actual structure (or big picture) of the project, this could help keep things in order.  If this is an included feature, I could not locate it.  Thank you in advance!

- Status changed from Open to Closed

You can change the parent issue later on. AFAIK you need the "Edit issues" permission in the respective project. Then click on the little [\\_\(more\)\\_](#) link at the top of the issue update form (besides [\\_Change properties\\_](#)). The form will allow you to set the parent issue among other things.

We are aware that this link is not really obvious to find. This is going to be improved in future versions of ChiliProject.
