

## ChiliProject - Bug # 931: Change "Issue Preview" to Button from link

<b>Status:</b>	Open	<b>Priority:</b>	Normal
<b>Author:</b>	Radim Kolář™	<b>Category:</b>	User interface
<b>Created:</b>	2012-03-13	<b>Assignee:</b>	
<b>Updated:</b>	2012-03-22	<b>Due date:</b>	
<b>Remote issue URL:</b>			
<b>Affected version:</b>			
<b>Description:</b>	Currently UI for creating new issue is bit inconsistent.		
	Preview is just link, not button like 2 buttons before it. This makes it way smaller and harder to notice.		
	It should be converted to button like in <code>_Trac_</code> . Also <code>_Trac_</code> features auto preview feature which is very useful - after while, preview is displayed even without user clicking on <code>_Preview_</code> button.		

### History

I've created a very basic PoC for this issue - <https://github.com/EspadaV8/chiliproject/commit/0b3dccb138a9406dfbe559e507e5455f4a4a1cba> - that changes the preview link on the new issue page to an HTML `<input type="button">` (ideally this should be a `<button type="button">` but rails 2 doesn't have that available).

The JS has been removed from the 'onclick' event into a `<script>` tag as well (which should be moved into, probably, the `application.js` file).

The main problem with having them all as buttons is that they get lost. It would be nice to have a bit of a design for each of them, possibly using something like Bootstrap - <http://twitter.github.com/bootstrap/base-css.html#icons>
